

Vale Park Road Overpass of SR 49 to Close May 18-28

In order to complete a maintenance project, the Indiana Department of Transportation will close the Vale Park Road (CR 400N) over SR 49. The project is scheduled to begin on or just after May 18 and complete by May 28. Detours will be marked by INDOT and both emergency services and schools have been notified. The City of Valparaiso is encouraging motorists using this overpass to allow extra travel time and use alternate routes during the construction.

“To make travel easier for motorists during the INDOT project at 49 and Vale Park, the City of Valparaiso is ensuring that Silhavy Road will be fully operational in both directions during from May 18-28,” said Don McGinley, Valparaiso’s Director of Project & Facility Management. Silhavy Road is currently undergoing utility relocation to make way for improvements to the roadway, scheduled to be substantially complete by the end of 2021.
